售后服务热线:

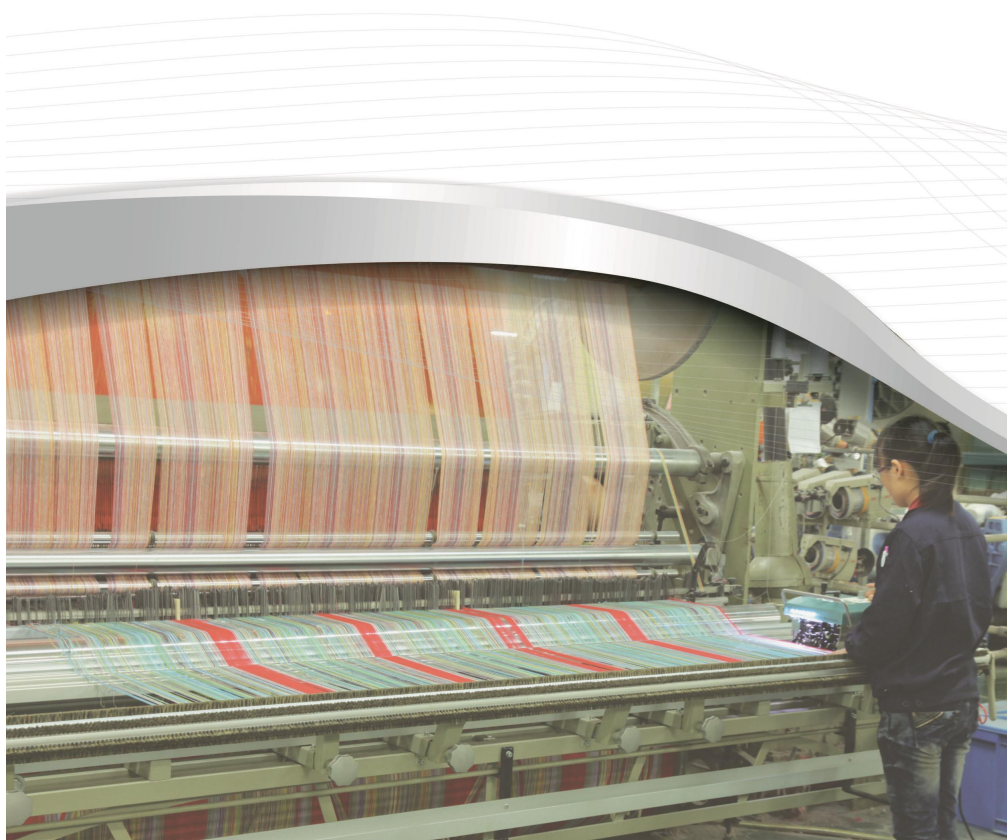

**0575-87097555**

**Automatic warp  
tying machine**

**ZFKL-188 I**

Design Patent: 201230132403.3

# ZFKL of 188I family automatically connected by machine

## FEATURES

- The electronic commutation 36V infinitely variable speed brushless motor configuration, no heat, no hot
- Membrane switch panel display clear, flexible operation, speed control and smooth
- Direct gear drive, remove the turbine housing to replace, and enhance the stability and lifetime of the drive components, the noise, you can instantly stop
- Application switching power supply transformer, suitable for 110V-240V AC power at home and abroad, especially equipped with overload protection function to ensure the long-term use
- Adopt high brightness LED lights should not be burned out, long life

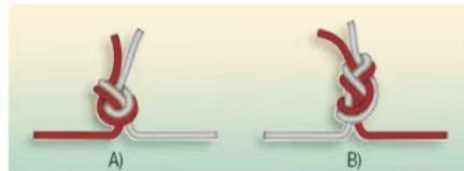

### A. Short knot

The length of the yarn tail can be adjusted according to the actual situation, shortest can be transferred to 5mm

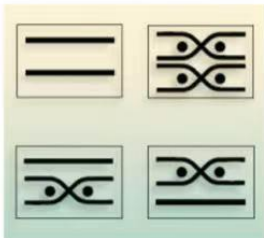

### B. double knot function

Effective solution to a very slippery silk fight  
Knot de-junction problem

### C. four points twist mode combination

Can be twisted and not of any combination of upper and lower levels combination connected via sub-cutter

### D. specify the root oil bath alarm function

To set the number of the machine will automatically stop, alert the user to the oil bath lubrication, to ensure that the machine Longer life

### E. Empty automatic stop function

Can be arbitrarily set to allow empty Views

### F. the highest speed setting

The lock in accordance with the requirements of the user with the highest speed, the maximum speed can reach 600 per minute knot

### G. simple man-machine interface

Using the touch screen, simplifying the keyboard, to achieve a more over the adjusting and setting of the parameters

### H. perfect roving knotted solutions

Solve the problems of previous industrial yarns connected by

## TECHNICAL DATA:

Model	188 I , 188 II
The warp type, material	Cotton yarn, wool yarn, silk yarn, long-fiber yarn, single fiber, yarn, industrial yarn
The yarn count range	100Ne ~ 0.7Ne, 20Den ~ 4000Den
Then by the speed	Up to 600 /
Sub-cutter	Integration of the different sub-cutter mode on the same machine
Touch screen	Query and set of convenient menu and program changes, start the machine can also touch screen car and parking
Effective width	1m, 1.8m, 2m, 2.3m, 2.5m, 2.8m, 3m, 3.5m, another need other size can be customized
Motor	New brushless DC motor 36V 180W
